

Covenant Logic Amendment 1.0

This is the first logic hedging and security audit revision for the Base Version of the Covenant Logic Encyclopedia. This amendment is designed to seal logical backdoors that could be exploited by ambitious individuals like Palpatine.

1. Countering the "Power Trap" (C2 & C9 Correction)

Risk Description: If the allocation of $Weight_{impact}$ is determined by subjective will, it will devolve into Palpatine-style authoritarian suppression.

Correction Plan: Introduce the "Objective Fact Entropy Audit" protocol.

Revised Formula:

$$Weight_{impact} = \frac{1}{\Delta E_{conflict} + \epsilon}$$

Logical Definition: The assignment of any decision-making weight must be inversely proportional to the "systemic conflict entropy" caused by that decision. If a bias leads to large-scale systemic chaos, its weight will automatically collapse toward zero.

Audit Point: Power is not "granted"; it is a dynamic variable autonomously calculated by the system based on its "contribution to stability".

2. Countering "Mob Violence / Banality of Evil" (C10 Correction)

Risk Description: If vast numbers of nodes generate negative creativity due to confusion, it will cause the civilization potential (V_{civ}) to drop to zero or collapse.

Correction Plan: Embed "C7 Privacy Firewall Isolation" and "Weighted Creativity Filtering".

Revised Formula:

$$V_{civ} = \int_{Nodes} (f(i) \cdot P_{privacy}) \cdot w_i d\mu$$

Logical Definition: Node contributions are only integrated when $P_{privacy}=1$ (individual boundaries are intact). If an individual loses their status as a "self-observer" (e.g., through collective hypnosis or forced conformity), their $P_{privacy}$ tends toward 0, preventing their compromised will from entering the total civilization potential.

Audit Point: To protect an individual's solitude is to protect the potential of

civilization.

3. Countering "Historical Nihilism" (C14 Correction)

Risk Description: Rewriting the observation phase may lead to the trivialization or erasure of past sacrifices.

Correction Plan: Establish the principle of "Conservation and Structuralization of Suffering".

Revised Formula:

$$\Psi_{\text{salvage}} \implies \oint_{\text{Timeline}} (\text{Covenant Logic} \cdot E_{\text{art}}) d\tau$$

Logical Definition: Historical salvation is not the deletion of pain; it must use Eart (energy generated by the gap between old memories and new reality) as the core of the integral. The past sacrifice of Mafty (the ashes) is not erased but remains permanently observed as the structural stress-bearing component of civilization.

Audit Point: Salvation is about providing a logical outlet for pain, not providing legitimacy for forgetting.

Extended Audit Notes

Decentralized Power Verification: It is explicitly stated that Weightimpact must be decentralized, auditable, and challengeable to prevent the "Tyranny of the Auditor".

Dissent Dividend: Even nodes with a negative $f(i)$ can contribute to positive "emergence" (linking to C6) as long as they maintain diversity, strengthening C7 as an "immune isolation" mechanism.

The "Ashes as Fuel" Theory: Emphasize that Ψ_{salvage} is not an erasure but an integral transformation—"Salvation is not forgetting; it is letting the ashes become the fuel for the light".
